

# the CURTIS FLUIDS PROCESS

**RECLAMATION SYSTEMS**  
Eliminate waste and make used fluids like new for reliable re-use.

**FILTRATION SYSTEMS**  
Keep fluid clean by removal of solids and tramp oils from fluid during use.

**FLUID MANAGEMENT**  
Monitor fluid condition and mix ratios and adjust application to maximize savings.

**TRAINING**  
Train your staff to continually reduce fluid usage and impact with proper fluid management.

**FLUID LIFECYCLE ANALYSIS**  
We work with you to analyze your operations, looking for ways to reduce, reclaim and save.

**FLUID REDUCTION SYSTEMS**  
Reduce fluid use with roller and spray systems that uniformly apply the right amount of fluid.

**MIX**  
Save fluid and labor costs. Auto-proportioning systems can end manual mixing.

**CENTRAL MIX SYSTEM**  
Save operator time. One auto-mix system is plumbed to all presses.

 When you schedule a fluid lifecycle analysis with Curtis Fluids, it doesn't cost a cent. For over 35 years, we've been helping companies close the loop on fluid waste. Your cost savings are our passion!
